

## Floor Area: 160m<sup>2</sup>

The *Kupe* is small and compact yet is designed to feel large and open. The large glass windows bring in the surrounding environment and the high ceilings in the living space open the place up to feel larger than life.

This home is designed to allow the natural integration of a garage into multiple sections of the house depending on its location or orientation.

The *Kupe* can be used as a bach or a home, as either would be a great architectural, four bedroom choice.
